

# Chen Hung Han

1292 Napier Cres, Oakville, ON L6H2A4

[chenhung@sheridancollege.ca](mailto:chenhung@sheridancollege.ca) | 647-471-8456

- Software Developer -

---

## Highlights of Qualifications

- Experienced in Java, PHP, HTML, CSS, JavaScript, networking and database design
  - Currently enrolled in Software Development and Network Engineering program
  - Completing 1st year of 3-year program – GPA 3.68/4.0
  - Represented high school to participate in a coding competition
  - Strong self-learning with problem solving skill gain through past working experience(sample)
  - Attention to detail to write effective code
- 

## Technical Skills

**Programing Languages:** Java, PHP

**Web development:** JavaScript, HTML, CSS

**Database:** MySQL and SQLServer

**Software and Others:** GitHub, MS Office (Word, Excel, Access, PowerPoint)

---

## Education

**In Progress Advanced Diploma: Computer Systems Technology - Software Development and Networking Engineering**, Sheridan Institute of Technology and Advanced Learning, Oakville (Sep 2018 – Dec 2021)

- Application design, programming, networking, database and web

### Project Work:

- **Object Oriented Programming 2 - Airplane Gate Assigner – Designed by Apr 2019**  
<https://github.com/hunghanchen/GateAssigner.git>
  - Apply ArrayList, DataBase and JavaFX into this project and present as final project
  - Input the airplane (domestic, international, or cargo) and departure and arrival time, date and place
  - Automatically assign the gate for the airplane, cannot overlap the time between the two airplanes
  - Showing all the airplane information in the table column about the assigned gate number and all the information the user input
  - User can filter which gate number they want to see on the schedule and sorting the date and time
- **Fundamentals of Software Design- Black Jack card game – Designed by Apr 2019**  
<https://github.com/neilfr/SYST17796Group10.git>
  - Design black jack card game with design pattern principle, Unit testing and visual paradigm
  - Program designed can multiple players join this black jack card game
  - Apply the MVC pattern to this project
  - Test with JUnit framework and design manual testing.

## Courses completed or in progress:

- Object Oriented Programming 2 – Java
- Web Programming
- Linux/Unix Operating Systems
- Computer and Network Security
- Data Network Design and Configuration – Routers & Switches
- Database Design and Implementation
- Computer Architecture
- Enterprise Java Development
- Systems Development Methodologies

**Bachelor's degree: Department of International Business**, National Taipei University of Business, Taiwan (Sep 2009 – Jun 2013)

- International trade expertise, finance expertise, management expertise and ethics, innovation and integration ability
  - Internship in department of insurance at Fubon bank for four months and passed Personal insurance representative exam to obtained certificate
- 

## Employment Experience

### Cook and Service

**Sep 2018 - Present**  
**Oakville, ON**

Aroma Espresso Bar

- Prepare the fresh food and serve the menu food to customer
- Provide excellent customer service by listening, problem solving and providing information
- Prepare and organize large catering order for big event
- Check the stock level and order the inventory

### Realtor

**May 2015 - Apr 2018**  
**Taiwan**

Yung-Ching Realty Group

<https://www.yungching.com.tw/>

- Analyzed market trend, according to the history of transactions, banking interest rate, and regulations to accurately advise clients and generate the professional proposal
- Obtained the latest house nearby sold price to give advice to clients to determine the ideal price
- Represented buyer or seller, act as an intermediary to negotiate with buyer or seller
- Helped clients to understand what kinds of properties they are seeking
